

Javascript Assignment

Build a responsive todo list with following features:

1. Add new task
2. Delete existing task
3. Search for a specific task
4. If task is not found while searching, show message no results found
5. Mark task as done but checking the check box
6. Store details in local storage so if we refresh the page, data is fetched from the local storage instead of starting from scratch again.

Add

Todo List

<input type="checkbox"/>	<input type="checkbox"/> Test React Ant Design Todo List	<input type="button" value="Delete"/>
<input type="checkbox"/>	<input type="checkbox"/> Write About React And Ant Design	<input type="button" value="Delete"/>
<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/> Finalize Presentation	<input type="button" value="Delete"/>
<input type="checkbox"/>	<input type="checkbox"/> Book Flights To Ireland	<input type="button" value="Delete"/>
